# FOIA Tracking Progress

FOIAXpress utilization measures by calendar year	Calendar Year 2017	Calendar Year 2018
# or requests and appeals submitted in to DCGOV and tracked in FOIAXpress	7346	8120
# of requests submitted via Web PAL portal - includes requests and appeals	5387	6228
# of agencies enrolled in FOIAXpress	53	55
# of agencies processing at one request in system	51	52
# of current active DC Government users	112	141
# of Records published to the public reading room	0	92
# users trained	N/A	93

Other FIOA related improvements by OCTO:

- Began publishing redacted versions of [FOIA Requests](#) from FOIA express as open data.
- Began regular tracking of email search backlogs and have increased staffing and reduced backlogs. Email searches are a major factor in the timely processing of requests.
- Changed agency request form for searches so OCTO is no longer requiring agencies to submit more information to OCTO than is legally required for searches.
- OCTO used to try to charge agencies that needed new FOIAXpress accounts. That pushed agencies out of the system. OCTO negotiated a better deal with the vendor and no longer charge agencies.

Connecting You with Government Data

Find District Data...

On this site, the District of Columbia government shares hundreds of datasets. DC realizes that data's greatest value comes from having it freely shared among agencies, federal and regional governments and with the public to the extent possible when considering safety, privacy and security. The District invites you to browse the data, download it as a file, analyze it with your tools, or build apps using our APIs.

## Published Apps and Data Uncovered

Jump into these government apps and dig up the data behind them.

What was missing then...

- Forward facing, **not buried** in dc.gov
- Interaction with District **agency apps**
- Easier real-time access
- **Consistent update cycles**
- Engagement & offerings **servicing all audiences**
- Mobile support
- Ability to **quickly modify UI** and **quickly publish** new data – previously highly customized

# Working towards...

- **Data Visualized is Data Downloadable**
  - No charts/maps without accessible data
  - Can be sources on other dc.gov websites
- **Better Education and Interpretation**
  - Impactful narratives with universal language
  - Tell the story behind high-value datasets - relationships
- **Increased Use of Existing Content**
  - Narratives direct from DC agency originator
  - Other BI visuals in addition to AGOL
- **Distributed Ownership**
- **Opendata.dc.gov as a source**
- **Audience – learners of all persuasions**

All material best when related to data, or is used to interpret value of agency data.
